DETAILED ACTION

1. Claims 1-13 are pending.

Election/Restrictions

2. In response to the Restriction Requirement, Applicants elect without traverse the invention of Group I, Claim 2 and Claims 1 and 3-7 in part, drawn to a compound of Claim 2 wherein either X or Y is S. Applicants also select 6-(3,4-difluoro-phenyl)-8-methyl-5,7-dioxo-6,7-dihydro-5H-[1,3,4]thiadiazolo[3,2-a]pyridine-2-carboxylic acid (2-methoxy-pyridin-4-ylmethyl)-amide (Claim 7 on page 88, at lines 10-11) as the species. Claims of the non-elected Groups II to III are withdrawn from further consideration as being drawn to the non-elected inventions.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The substituent R in formulae 2, 4, 6, 7, 8, 9, 123 has no antecedent basis in the base claim 1 wherein only R10 is described in the definitions of X, Y.

It is recommended that 'suitable' be deleted from 'suitable substituents' in claim 1 to better define the claim, as the criteria for suitability have not been described in the specification.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Harris R.L.N. (Australian Journal of Chemistry (1972), 25(5):993-1001, PTO-1449). Compound 15(c) and compound 18 (a) are encompassed by the instant claims.

6. Claims 1, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Galera et al. (Journal of Heterocyclic Chemistry (1986), 23(6): 1889-92). Compounds of the following structures are encompassed by the instant claims.

• Br⁻

• Br⁻

7. Claims 1, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Diaz et al. (Journal of Organic Chemistry (1994), 59(26): 8294-96). Compounds of the following structures are encompassed by the instant claims.

• Br⁻

Art Unit: 1625

8. Claims 1, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim D.G. (Chemistry of Heterocyclic Compounds (New York)(Translation of Khimiya Geterotsiklicheskikh Soedinenii) (1999), 35(3), 290-292). Compound of the following structures is encompassed by the instant claims.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –
 (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Bunker (US 2003/0144274).

Art Unit: 1625

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

The species compounds of claim 17 (pages 49-50) are encompassed by the instant claims.

Double Patenting

10. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 15-17 of copending Application No. 10/264764. Although the conflicting claims are not identical, they are not patentably distinct from each other because the compounds of the copending claims are encompassed by the instant claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1625

Claim Objections

11. Claims 1-7 are objected to because they contain non-elected subject matter.

Amending the claims to the elected subject matter would overcome the objection.

Conclusion

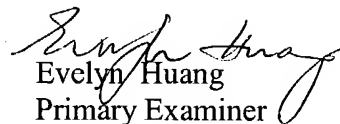

12. The compounds of claim 7 within the elected Group I invention are allowable.

These compounds, wherein A is amido, R1 is optionally substituted benzyl or pyridylmethyl and R2 is optionally substituted benzyl, are neither anticipated nor rendered obvious by the prior art of record.
